

Issues with Trans-Loc

The bus times listed are not always synced

Needs to be more user-friendly

If the internet is out, the routes do not show --> Offline options?

More reliable
--> no crashing

Functionality

Routes should be up to date

Show route closures, traffic, and other Comet updates in-app

Integrate into other GPS apps

List Night routes more accurately

Accurate Tracking

On-demand bus system should be easier to navigate and understand

Bus locations need to be tracked in an accurate and up-to-date manner

Notifications

Have a tutorial to help students understand the functionality

Interface Ideas

UI of updated/new app should be easily navigated and aesthetically pleasing

Put class locations and schedules in to highlight routes they

Bus Icon --> Gamecock driving the bus

USofC Integration

Merge Transloc with university events and points of interest.

List other Comet bus routes (which are already paid for by tuition + carolina card)

app should be owned directly by university, rather than third-party service

Map centered on USofC Routes only

Route Fixes

Have consistent routes in place

Make routes easier to understand with better street marking / identification

Fare should always be listed as N/A for school approved routes

Have buses specifically marked for less popular parts of campus

Drag and drop route system

Automatic Route Refreshing
