# Issues with Trans-Loc

The bus times listed are not always synced

Needs to be more user-friendly

If the internet is out, the routes do not show --> Offline options?

More reliable --> no crashing

# Functionality

**Routes should be up to date**

**Integrate into other GPS apps**

**Accurate Tracking**

Bus locations need to be tracked in an accurate and up-to-date manner

Have a tutorial to help students understand the functionality

Show route closures, traffic, and other Comet updates in-app

**List Night routes more accurately**

On-demand bus system should be easier to navigate and understand

Notifications

# Interface Ideas

UI of updated/new app should be easily navigated and aesthetically pleasing

Put class locations and schedules in to highlight routes they

Bus Icon --> Gamecock driving the bus

# USofC Integration

Merge Transloc with university events and points of interest.

List other Comet bus routes (which are already paid for by tuition + carolina card)

app should be owned directly by university, rather than third-party service

Map centered on USofC Routes only

# Route Fixes

**Have consistent routes in place**

Make routes easier to understand with better street marking / identification

Fare should always be listed as N/A for school approved routes

Have buses specifically marked for less popular parts of campus

**Drag and drop route system**

Automatic Route Refreshing
